Severe Weather Outlook Thursday, December 03, 2020

Hazardous Weather

As the snowfall begins to taper off into the morning hours, there are a few remaining impacts for portions of the Panhandles. Moderate continue in the northeast Panhandles with the continued threat of blowing snow, especially with what has already fallen. Minor threats continue in areas that saw lower snowfall amounts throughout the day. The main impacts are reduced visibility and slick roadways as the winds will remain breezy into the morning hours and temperatures continue to drop with potential freezing on roadways.

Gusty winds from 15 to 25 with higher gusts are expected for the Islands, Bolivar Peninsula and over the Gulf waters. Advisories are in effect through this evening.

Hazardous Weather

Cooler temperatures are expected today in the wake of the cold front. Sunny skies expected for majority of the area with the exception of the Rio Grande Plains where partly cloudy skies are expected.

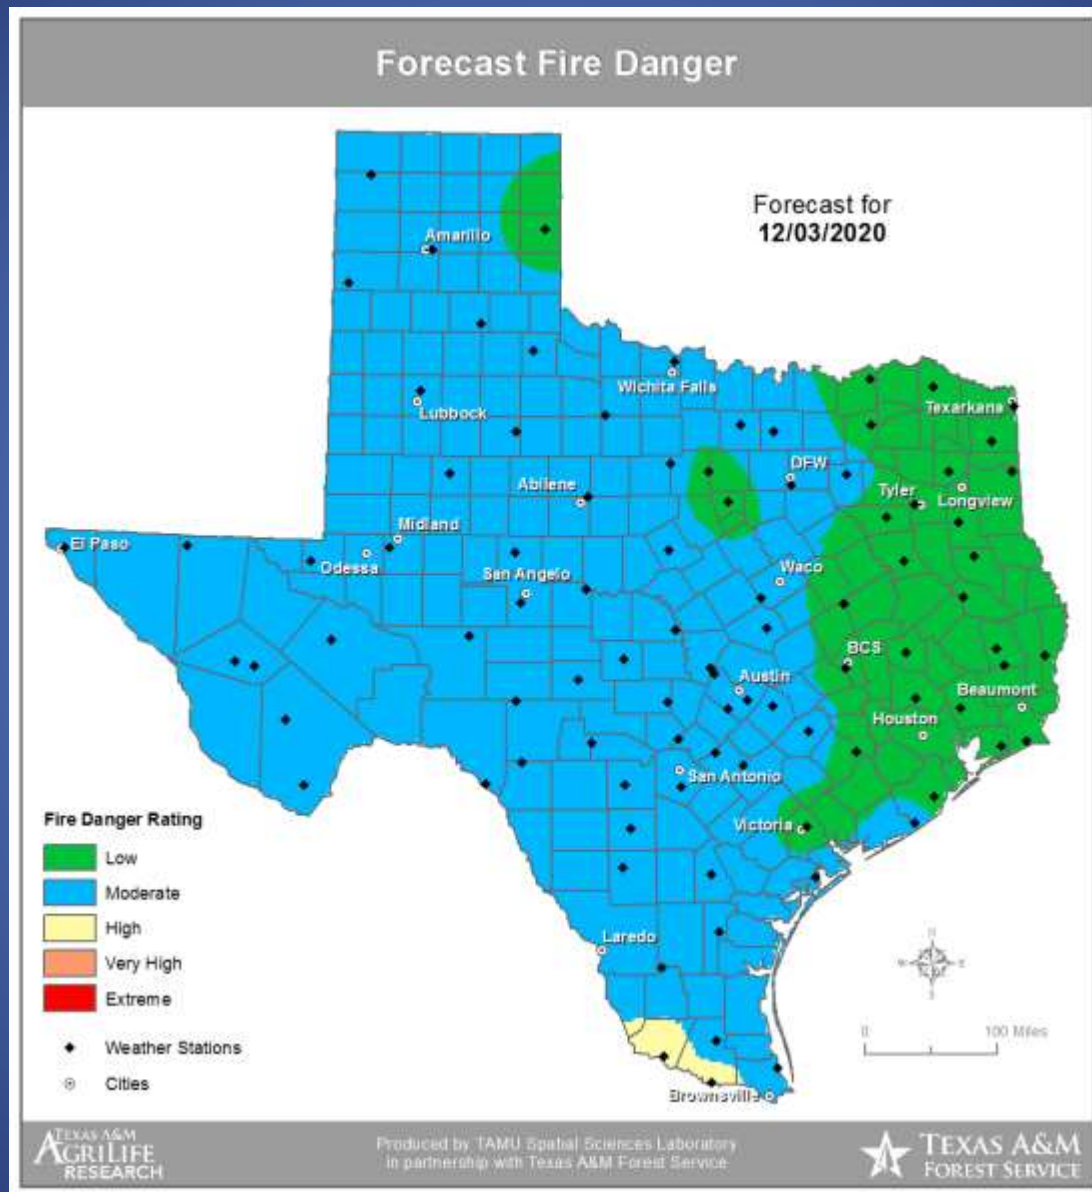

A Small Craft Advisory is in effect from 9 PM tonight until Noon Thursday for the Laguna Madre, and from 9 PM tonight until 6 PM Thursday for the Gulf Waters between 0-60 nautical miles. North winds of 20-25 kts with gusts up to 35 kts are expected, with sea heights of 7-10 feet expected over the Gulf of Mexico. Conditions will be hazardous to anyone operating small craft during this time.

Hazardous Weather

High temperatures will only range from the upper 50s to the low-mid 60s today, with gusty northwest winds adding to the brisk feel, especially in the morning. Much drier air is also moving in behind yesterday's cold front, with a Fire Danger Statement in effect for all areas except the immediate coast.
